main.py

```python
num=int(input())
temp=num
reverse = 0
while temp > 0:
    remainder = temp%10
    reverse = (reverse * 10) + remainder
    temp = temp // 10
if num == reverse:
    print('Palindrome')
else:
    print("Not Palindrome")
```

Output

```
121
Palindrome
